

T12 Angle Drill 12V

T12AD

The T12AD Angle Drill features a compact, precision motor for long life and delivers 18Nm of torque. All-metal precision gearing through a 90° angle provides durability and efficient power delivery with excellent driving and drilling performance. Optimised for easy handling, the compact design allows the tool to be held in multiple positions for access to confined spaces. Rubber over-moulded grip reduces vibration and the built-in LED work light ensures clear visibility in confined areas. The 90° drill head with low-profile 10mm (3/8") keyless chuck reduces the drill head depth to a fraction of that of a conventional design drill/driver, enabling the T12AD to access a wider range of drill points and screw heads. The intelligent 1-hour charger maximises battery runtime and reaches an 80% charge level after 30 minutes. A range of safety features protects the batteries, charger and the tool. Includes 2 x 1.5Ah battery packs fitted with high-performance Li-Ion cells, and is supplied with a soft case.
