

# 300W Keyless Multi-Tool

## TMUTL UK

The TMUTL Keyless Multi-Tool features a compact, precision motor for superior performance and long life. Precision all-metal gearing and accessory mounting ensures superior durability. The powerful 300W motor delivers a variable speed from 11,000 to 21,000rpm and oscillating arc range of 3.2° allows precise control during cutting, sanding, grinding, polishing and scraping tasks. Optimised for easy and controlled handling. The dual-sided auxiliary handle can be removed and the compact design allows operation in confined spaces. The rubber over-moulded grip reduces vibration and fatigue for repetitive work. The universal accessory mounting features a keyless spindle, which allows tool-free changing of a wide range of blades and accessories, fitted securely with the multi-buttoned spindle bolt when locked in place.
