

750W Pendulum Action Jigsaw

TJS001

The TJS001's powerful 750W motor and three-stage pendulum action deliver an incredibly fast cutting performance. Dual-axis grips allow the tool to be held with both vertical pressure and horizontal direction control. When a perfectly straight cut is needed, the supplied track adaptor and parallel guide transform the Jigsaw into a precision tool ideal for breaking down larger sheets and fine trimming finished pieces. Detailed work is no problem with the precision bevel, which can cut up to 45° in wood, steel or aluminium. Keeping a clean jobsite is essential for continuous work, and the TJS001 is supplied with a dust extraction port adaptor, which can be connected to a workshop vacuum. The jigsaw is also supplied with a practical carry case, which ensures a quick clean-up and pack-up every time.
