

# TWX7 Side Support

## TWX7SS

Working with larger workpieces on the TWX7 Workcentre is no problem when using the TWX7SS Side Support, providing the operator more safety, control and precision. The support extends out to 600mm from the centre line to accommodate the larger workpieces and can then fully slide back into the TWX7 with no gap between the support surface and Workcentre table. Low-friction support surface allows larger workpieces to be moved smoothly and safely, and the strong, dual chrome-plated extension provide smooth length adjustment. The TWX7SS Side Support not only extends the capacity of workpiece sizes on the TWX7 Workcentre, but also the range of possible woodworking projects for woodworking enthusiasts at home or on the worksite.

- Strong, dual chrome-plated extension bars for easy and smooth width adjustment
- Support extends out to 600mm from table centre line to accommodate larger workpieces
- Support slides fully back into workcentre with no gap between support surface and Workcentre 7 table
- Low friction support surface and accessory mounting holes
- Compatible with the TWX7 Triton Workcentre

## Technical Specification

<b>Product Height</b>	102mm
<b>Product Length</b>	710mm
<b>Product Width</b>	360mm
<b>Product Weight</b>	2kg
