

TWX7 Workcentre

TWX7 UK

The TWX7 builds on the legacy of previous Triton Workcentres, with their reputation for precision, ease of use and versatility. Using the latest advanced materials technology and a new fast-change modular approach, this new system is ideal for the workshop enthusiast as well as the on-site carpentry professional. " The TWX7SS Side Support not only extends the capacity of workpiece sizes on the TWX7 Workcentre, but also the range of possible woodworking projects for woodworking enthusiasts at home or on the worksite. Fast switch-out modules transform the Workcentre between modes from clamping table (supplied as standard with the Workcentre), to router table to table saw or project saw. Optional side and outfeed supports extend the frame for larger workpieces, whilst a rugged transit kit and folding frame bring a new level of portability to this workshop classic.

- Versatile woodworking station with a multitude of accessories for the capacity to tackle any woodworking task
- Quick and easy drop-in modules instantly reconfigures the Workcentre for different woodworking tasks
- Non-latching, built-in mains isolator power switch with over-sized OFF switch for hand or knee operation
- Includes versatile clamping table module compatible with a wide range of bench, anchor and clamp dogs
- Folds down for portability and storage - ideal for small workshops or moving to exactly where required
- High-quality materials and components keep the workcentre and modules working for many years
- Module levelling screws provide an easy way to achieve a perfectly level surface
- Huge 150kg (330lb) load capacity takes the largest of workpieces
- Built-in table side hooks for storage and easy access
