

# **triton** Product Specification Sheet

## **Multi-Stand**

MSA200

### **Features**

Multi-purpose support stand with extra-wide tripod base for excellent stability on level or uneven ground.

Low-friction slide surfaces provide smooth, controlled travel without unwanted "steering" of the workpiece. They ensure your work only moves when you want it to.

The swivelling and tilting head can clamp pieces of wood for many applications in the workshop, at home and on-site.

Height adjusts from 635 - 940mm (25" to 37") and folds for easy transport and storage.

Supports over 100kg (220lb).

Unlike a conventional roller stand, the low-friction skids on Multi-Stand ensure the workpiece follows the direction of feed, rather than the direction the roller is facing.

Although the workpiece glides effortlessly across the skid surfaces, there is no tendency for it to roll away unassisted.

### **Specifications**

<b>MAX. LOAD:</b>	Over 100kg (220lb)
<b>HEIGHT RANGE:</b>	635 - 940mm
<b>TILT ADJUSTMENT:</b>	Vertical through horizontal
<b>WEIGHT:</b>	6.2kg (13.7lb)
