

7.3A / 1.2hp TRIMMER ROUTER 1/4"

TMNRTR

The TMNRTR 7.3A / 1.2hp Trimmer Router is Triton's answer for a handy, lightweight, compact router that is easy to control, achieves a fine finish, and is ideal for a variety of handheld tasks including mortising, moulding and edging of laminates.

Supplied with two bases, the trimmer base includes an edge roller guide attachment for use with bearingless cutters, and the dual circular and flat-sided plunge base doubles as a router lift when fitted to a compatible router table and used with the included table height winder. The parallel guide fence attaches to the plunge base for a range of 0 - 5 1/8".

ROUTER TABLE COMPATIBLE

Table height winder & plunge base combine to create built-in router lift

VERSATILE EDGE ROUTING

Trimmer base with roller-guide attachment for routing with bits without bearings

TWO BASES INCLUDED

Plunge & Trimmer router bases included for maximum versatility

TECHNICAL PERFORMANCE
