

1400W Plunge Track Saw

TTS1400

The TTS1400 Plunge Track Saw is a highly versatile, feature-packed tool with easy mode selection, fast set-up and advanced safety features. When fitted to a track, the TTS1400 delivers long, straight cuts, and the flat design of the blade housing means the saw will work right up to the edge of the workpiece – ideal for trimming doors and cutting hardwood flooring. The mode selector allows quick change between free plunge, scribe or blade change, and cutting width indicators show the exact point at which the blade plunges into the workpiece. Blade changing is safe and easy. The power switch locks out during the blade-changing process, and the blade is easily accessed through the blade guard without having to remove the cover. For straight, clean, accurate cuts through any type of wood, Triton's TTS1400 Plunge Track Saw delivers a professional result every time.

- Precise plunge saw for straight and bevel cutting
- Powerful 12A motor with variable speed, soft start, overload protection and constant speed electronics
- Close cutting only 5/8" away from wall
- Dual front and rear bevel quadrants for improved stability
- Free plunge, scribe and blade change modes
- Dual alignment cams for fine tuning the saw base with the track
- Anti-kickback for improved safety
- Mode selector allows quick change between free plunge, scribe, and blade change modes
- Compatible with other market-leading track systems
